It is high time the DOJ put this mess to rest. We do not approve of our tax dollars being used to help certain competitors compete with Microsoft. This is supposed to be a free market. If IBM's OS2, Linux and Unix cannot compete with Windows, it is not the Governments problem. You are in danger of unfairly destroying the only competition the huge AOL-Time Warner conglomerate has. This has never been about protecting consumers.....it IS about helping certain competitors who made some poor business decisions.
